Santa Fe.—Isidro Martinez, 28 years old, charged with the deliberate murder with a gun of his 25-year-old wife and attempting to shoot his mother-in-law, at Santo Nino, near Santa Cruz, was brought to jail here after a spectacular gun fight with a posse headed by Undersheriff George Armijo, staged in a wheatfield near Truchas, close up under the shadows of the lofty Truchas peaks. Over thirty-five shots were exchanged when Martinez, brought to bay, jumped up from his hiding place, whirled around and emptied his gun first in one direction and then another at the advancing officers, only to fall wounded in a half a dozen parts of his body by glancing shots. She Has Skill With a Skillet.

Where we are living at present we have no gas range, only a two-burner plate, and the coal range is so large that it requires a great deal of fuel to heat the oven sufficiently to bake even a few muffins or biscuits, so that I have tried to find a satisfactory substitute that could be cooked in a skillet. By using the skillet dry and sprinkling it lightly with flour, I bake very enjoyable biscuit, cake or scone. For these I use simply a biscuit batter, made a trifle stiffer, patted or rolled to about a quarter-inch thickness. One must be sure to have the fire or gas low enough not to burn the outside of the scone before the inside has time to cook sufficiently. If gas is used, a more even distribution of the heat may be obtained by using a heated lid from the stove under the skillet; or a heavy piece of tin or sheet iron will serve the purpose.—Woman's Home Companion.

M., or as soon thereafter as such hearing is called, why such application should not be granted.

That notice of such hearing be given by mailing a copy of this order to each of the creditors, parties in interest and attorneys entitled to notice in this proceeding, and by publishing a copy hereof in the designated newspaper of the county district of such bankrupt's residence, as provided by such law.

Big War Map.

An American exhibitor's war map is 15 by 20 feet in size, and shows the most of Europe, shaped to the earth's natural curvature, and with a roller exaggerated 10 times, the horizontal scale being 7.8 miles to the inch, and the vertical .78 mile. About 200 places are marked by electric bulbs. Their names are on a large indicator at the side, and as the lecturer causes the name of a town on this to light up, the corresponding bulb on the map begins to glow.

PLENTY OF WORK FOR FRIENDS OF BOYS AT FRONT

(Continued From Page 1)

It is probable that 979 will return without serious injury.

Artillery And Aircraft Protect

With the preponderance in aeroplanes and artillery which it is easily possible for this country to provide, it is believed that the casualties will be less than those in any previous war; and it is also assured that the arrangements for furnishing supplies for the hospitals and sanitary arrangements, and other protection for the soldiers, will be better than anything heretofore attempted in war. The men who go to the front fighting for the triumph of democracy and to overcome the forces of evil which have heretofore prevented general and lasting peace among the nations of the world, will, with few exceptions, come back heroes and better men in every way. Under the selective draft system it is the duty of many who are engaged in useful industries to remain where they can best assist the government in producing articles necessary for prosecuting the war; but those who, without good reasons, hang back and avoid their duty will regret it as long as they live and realize that they have acted the part of sneaks and cowards.

Help Men Into Service

The best thing that any friend can do for a man of military age, and for his relatives, is to assist him to get into the army or navy for service during the war.

It is said in some places that a man's first duty is to his family. Even so, the highest duty a citizen of the United States can perform for his family is to help preserve for them the liberty they enjoy under the government of this great republic, and save them from the fate which will be theirs if the Central Powers, Prussians, Austrians and Turks should win the war. No soldier's family in the United States will suffer want while he is absent in the army, and the government insurance system will provide for them in case of his death.

Fighting For Our Safety

German agents are industriously circulating the other false charge that this war is being urged by the United States for the benefit of England. Nothing could be further from the truth. U. S. Ambassador Gerard and other Americans have spent much time in Germany during recent years have positive knowledge of the hostile intentions of the Imperial German Government toward the United States, and for several years the British navy is all that has stood between this country and the fate of Belgium.

I believe it is lack of knowledge of the true facts connected with this war and of the imminent danger that if the people of this country do not quickly put forth their best efforts to win the war on foreign soil it will have to be fought out to the bitter end in our own country, which has caused so many of our citizens and their relatives to seek exemption from military service under the selective draft, and I hope that your council will endeavor to place before the people of your county the facts and the necessity for helping the government in every possible way.
